

at least one frame; and

a plurality of interchangeable wall panels having a variety of decorative surface designs so that the appearance of the display system can be changed by removal and replacement of the wall panels.

19. (Amended) An interchangeable panel display system, comprising:

a frame including a base, a first wall section positionable in an upright position when the base is placed horizontally on a surface, which first wall section has grooves for slidably receiving a wall panel therein and an opening for inserting a wall panel into the grooves and for removing the wall panel from the grooves, and a second wall section positionable in an upright position when the base is placed horizontally on a surface, which second wall section has grooves for slidably receiving a wall panel therein and an opening for inserting a wall panel into the grooves and for removing the wall panel from the grooves; and

a first wall panel slidably insertable into and removable from the grooves of the first wall section, the first wall panel comprising a support having a first decorative surface disposed on at least one side of the support, which decorative surface has a first design thereon; and

a second wall panel slidably insertable into and removable from the grooves of the second wall section, the second wall panel comprising a support having a decorative surface disposed on at least one side of the support, which decorative surface has a second design thereon that is different from the first design, wherein the first and second designs cooperate to depict a predetermined miniature environment.
